Team 14 Homework 2 Report

Demo:
https://youtu.be/30jT3RTyKA4

Positive:
Overall the assignment went really well. Each section was finished quickly and without much difficulty. Any issue that came up was handled as a team, allowing for the group to learn an equal amount.

Negative:
Because the project was made in parts by separate members, it took a little work to make the files work together. Things like variable names and file names had to match, so adjusting them took a little bit of time. In the future, this can easily be solved with more communication.

Contributions:
Caleb V. :
Wrote the php code and polished it to work correctly.
Taught the basics of PHP code to the team.

Cristian Q. :
Made the separate files into one working project.
Fixed issues between the two files.

Jaytonn H. :
Wrote the starter code for the html side.
